

Professor József Sándor at $\sigma(59)$ years

Krassimir Atanassov

¹ IBPhBME, Bulgarian Academy of Sciences, Sofia 1113, Bulgaria
e-mail: krat@bas.bg

I have known Prof. József Sándor since the middle of 1980s, from the pages of the Argentinian journal *Bulletin of Number Theory and Related Topics*, which does not exist any more but in some sense was inherited by this journal. It seems that each of us has carefully followed the publications of the other, seeing that we are both interested in closely related topics in number theory. Over the years, we have developed an active correspondence, but although we live in neighbouring countries, we have never met so far.

In 1989, we published our first joint paper, but it took us almost 20 years to publish our next two collaborative papers, in 2008. Since then we have been working on a joint book on arithmetic functions, which, I sincerely believe, will be accomplished in 2017. Back in 1995, when Tony Shannon, Aldo Peretti and me were discussing the colleagues whom we would invite for members of the Editorial Board of the *Notes on Number Theory and Discrete Mathematics*, Prof. Sándor's name was among the first ones being mentioned.

József Sándor was born on 19 November 1956 in Forteni (Farcád) near Odorheiu-Secuiesc (Székelyudvarhely), Romania. After attending elementary schools in Forteni, Taureni (Bikafalva) and Odorheiu-Secuiesc, he graduated in 1980 at Babes-Bolyai University of Cluj (Kolozsvár), Romania. After 3 years of teaching and research of mathematics at Sibiu (Nagyszeben, Hermannstadt), he returned to his home town of Odorheiu-Secuiesc, working in various middle schools and colleges. Beginning from 1997, and as of today, he is a member of the Department of Mathematics of Babes-Bolyai University of Cluj.

He started his research activity in 1978 as a student, publishing papers in Romania, Hungary and other countries from Europe, and later all over the world. His first publications were in the areas of number theory and mathematical analysis; then he published many papers also in other fields as geometry and geometric inequalities; special functions; theory of means; theory of inequalities; functional analysis and optimization theory; history of mathematics, etc. From the beginning, he solved many open problems related to prime numbers, Euler gamma function, Diophantine equations, arithmetic functions, approximation of functions, etc.

He found new proofs of certain results proved by others via difficult arguments, and his methods are indeed worth of a place in the “Book” imagined by P. Erdős. His first book, published by the Editorial House “Dacia” from Cluj, was “*Geometric Inequalities*” (in Hungarian) from 1988, known by many researchers in the field. In 1996 he published (in cooperation with Professors D. S. Mitrinovic and B. Crstici) his important monograph “*Handbook of Number Theory*”, by Kluwer Academic Publishers, and in 2005 and 2006 “*Handbook of Number Theory I, II*”, by Springer-Verlag. Other known books written by him, and connected with number theory are “*Geometric Theorems, Diophantine Equations and Arithmetic Functions*” (2002, USA), and “*Selected Chapters of Geometry, Analysis and Number Theory: Classical Topics in New Perspectives*” (2009, Germany).

Professor Sándor has published more than 1200 papers in journals all over the world. He is the Associate editor of 20 international journals, and one of the Editors-in-Chief of journal *Notes in Number Theory and Discrete Mathematics*. His name is known in Number theory related to “Sándor type functions”, “Sándor arithmetic inequalities”, or “Sándor–Tóth inequalities” and in the Theory of means by “Neuman–Sándor mean”, “Sándor mean”, “Sándor–Yang mean”; while in the Theory of inequalities as “Sándor–Szabó type inequalities”.

He is a member of American Mathematical Society, European Mathematical Society, János Bolyai Mathematical Society (Budapest), Romanian Mathematical Society (Bucuresti), Jangjeon Mathematical Society (Korea), Rado Ferenc Mathematical Society (Cluj). He is a reviewer of *Mathematical Reviews* (USA) and *Zentralblatt für Mathematik* (Germany).

As Professor Sándor claims, he had, and has, the great joy of having many coworkers (over 50) and friends (many...) in mathematical research, and thinks, this is one of gifts that life has offered to him.

**On behalf of the whole Editorial Board of the journal,
for the next $\sigma(60)$ years, I wish Prof. Sándor health and creative energy!**

Selected papers of József Sándor in number theory and related fields

- [1] Analytical methods in the theory of algebraic and transcendental numbers, Master Thesis, 1980, Babes-Bolyai University.
- [2] A class of irrational numbers (Romanian), *Gazeta Mat. A.* (Bucuresti), 4(1983), no. 1-2, 54-56.
- [3] Some classes of irrational numbers, *Studia Univ. Babes-Bolyai, Math.*, 29(1984), 3-12.

- [4] On the sequence of prime numbers (Hungarian), *Mat. Tan. (Budapest)*, 5/1985, 152-154.
- [5] On sequences, series and applications in prime number theory (Romanian), *Gazeta Mat. A.*, 6(1985), no. 1-2, 38-48.
- [6] On Jordan's arithmetic function, *Math. Student (India)*, 52(1984), no. 1-4, 91-96.
- [7] Variations on a theme by Hurwitz (with M. Deaconescu), *Gazeta Mat. A.*, 8(1987), no. 4, 186-191.
- [8] On a stronger Bertrand's postulate, *Bull. Number Theory Rel. Top.*, 11(1987), 162-166.
- [9] On Dedekind's arithmetical function, *Sem. Teor. Struct. no. 51 (Univ. of Timisoara, Romania)*, 1988, pp. 1-51.
- [10] Remark on two papers by K. Atanassov, *Bull. Number Theory Rel. Top.*, 13(1989), 56-59.
- [11] Note on the functions sigma and phi, *Bull. Number Theory Rel. Top.*, 12(1988), 78-80.
- [12] Remarks on the functions $\sigma(n)$ and $\varphi(n)$, *Seminar on Math. Analysis, Preprint no. 7, 1989*, 7-12.
- [13] An asymptotic formula concerning a generalized Euler function (with L. Tóth), *Fib. Quart.*, 27(1989), 176-180.
- [14] On some modifications of σ and φ functions (with K. Atanassov), *C. R. Bulg. Acad. Sci.*, 42(1989), no. 1, 55-58.
- [15] On the composition of some arithmetic functions, *Studia Univ. Babes-Bolyai, Math.*, 34(1989), no. 1, 7-14.
- [16] Some Diophantine equations for particular arithmetic functions (Romanian), *Sem. Teor. Struct.*, no. 53, *Univ. Timisoara*, 1989, pp. 1-10.
- [17] Remarks on Bernoulli polynomials and numbers, *Studii Cerc. Math. (Math. Reports)*, 41(1989), 47-49.
- [18] On the arithmetical function $d_k(n)$, *L'Analyse Numer. Theor. Approx.*, 18(1989), 89-94.
- [19] An application of the Jensen-Hadamard inequality, *Nieuw Arch. Wiskunde, Serie 4*, 8(1990), no. 1, 63-66.
- [20] On the arithmetical functions $\varphi_k(n)$ and $\sigma_k(n)$, *Math. Student*, 54(1990), 49-54.
- [21] On certain number-theoretical inequalities (with L. Tóth), *Fib. Quart.* 28(1990), no. 3, 255-258.
- [22] On some arithmetical products (with L. Tóth), *P. C. R. Math. Pures (Neuchatel)*, Serie I, 20, 1990, 5-8.
- [23] On some irrational series (with N. J. Lord), *Math. Mag.*, 65(1992), 53-55.
- [24] On some Diophantine equations involving the factorial of a number, *Seminar Arghiriade*, no. 21, *Univ. Timisoara*, 1-4.
- [25] Note on Jordan's arithmetical function, *Seminar Arghiriade*, no. 19, *Univ. Timisoara*, 1-4.
- [26] A note on semigroup-valued multiplicative functions, *Astra Mat. (Sibiu)*, 1(1990), no. 2, 18-19.
- [27] A note on G-multiplicative functions, *Bull. Number Theory Rel. Top.* 13(1989), 23-24.
- [28] An irrational series, *Astra Mat.*, 1(1990), no. 5, 24-25.
- [29] On a summatory formula and its applications (with L. Tóth and A. Vernescu), *Gazeta Mat. A.*, 12(1991), no. 3-4, 146-151.

- [30] A note on the functions $\varphi_k(n)$ and $\sigma_k(n)$, *Studia Univ. Babeş-Bolyai, Math.*, 35(1990), no. 2, 3-6.
- [31] The many facets of Euler's totient II: An assortment of miscellaneous topics (with R. Sivaramakrishnan), *Nieuw Arch. Wiskunde* 11(1993), 97-130.
- [32] On an inequality of Klamkin with arithmetical applications, *Intern. J. Math. E. Sci. Technol.*, 25(1994), 157-158.
- [33] A number-theoretical problem in Geometry (with Gy. Berger) (Hungarian), *Mat. Lapok, Cluj*, 2/1994, 44-46.
- [34] On a method of Galambos and Kátai concerning the frequency of deficient numbers, *Publ. Math. Debrecen*, 39(1991), 155-157.
- [35] On certain inequalities for arithmetic functions, *Notes Number Theor. Discr. Math.* 1(1995), 27-32.
- [36] On a new arithmetic functions, *Notes Number Theor. Discr. Math.*, 1(1995), 60-65.
- [37] On the arithmetical functions $d_k(n)$ and $d_k^*(n)$, *Portugaliae Math.*, 53(1996), no. 1, 107-115.
- [38] On certain inequalities involving the Smarandache function, *Smarandache Notions J.*, 7(1996), 3-6.
- [39] A note on primitive Pythagorean triangles, *Octogon Math. Mag.*, 5(1997), no. 2, 54-56.
- [40] On a Diophantine equation involving Euler's totient function, *Octogon Math. Mag.*, 6(1998), 154-157.
- [41] On the irrationality of $\cos 2\pi m/n$ (Romanian), *Lucr. Semin. Did. Mat.* 14(1998), 232-235.
- [42] Über eine Zahlentheoretische Funktion (with A. -V. Kramer), *Math. Moravica*, 3(1999), 53-62.
- [43] On a conjecture of Smarandache on prime numbers, *Smarandache Notions J.*, 11(1989), no. 1-2-3, 136.
- [44] On certain generalizations of the Smarandache function, *Notes Number Theor. Discr. Math.*, 5(1999), no. 2, 41-51.
- [45] On values of arithmetical functions at factorials I., *Smarandache Notions J.*, 10(1999), 87-94.
- [46] On a Diophantine equation, *Octogon Math. Mag.*, 8(2000), no. 1, 221-223.
- [47] On a limit for the sequence of primes, *Octogon Math. Mag.*, 8(2000), no. 1, 180-181.
- [48] On certain conjectures on prime numbers I., *Octogon Math. Mag.*, 8(2000), no. 1, 183-189.
- [49] On certain conjectures on prime numbers II., *Octogon Math. Mag.*, 8(2000), no. 2, 448-453.
- [50] On the difference of alternate compositions of arithmetic functions, *Octogon Math. Mag.*, 8(2000), no. 2, 519-522.
- [51] On the pseudo-Smarandache function, *Smarandache Notions J.*, 12(2001), no. 1-2-3, 59-62.
- [52] On a new Smarandache type function, *Smarandache Notions J.*, 12(2001), 247-249.
- [53] On two properties of Euler's totient, *Octogon Math. Mag.*, 9, 1B(2000), 502-503.
- [54] On a Diophantine equation involving arctangents, *Octogon Math. Mag.*, 9, 1B (2001), 511-514.
- [55] On certain exponential Diophantine equations, *Octogon Math. Mag.*, 9, 1B (2001), 515-517.

- [146] A double inequality for the exponential function, with application in prime number theory, *Octogon Math. Mag.*, 15(2007), no. 2, 797-798.
- [147] On the series $\sum_{n \geq 1} 1/nP(n)$, *Octogon Math. Mag.*, 15(2007), no. 2, 835-836.
- [148] On equation $\sigma(\varphi(n)) = n - 1$, *Octogon Math. Mag.*, 15(2007), no. 2, 884-885.
- [149] On the equation $\psi(n) = 3n - 1$, *Octogon Math. Mag.*, 15(2007), no. 2, 1256-1257.
- [150] A note on certain Euler–Mascheroni type sequences, *Scientia Magna*, 4(2008), no. 1, 60-62.
- [151] On some congruences for primality, *Adv. Stud. Contemp. Math.*, 16(2008), no. 2, 235-244.
- [152] On two conjectures of K. Kashihara on prime numbers, *Scientia Magna*, 4(2008), no. 2, 65-67.
- [153] A note on the arithmetical functions $d(n)$ and $\sigma(n)$, *Octogon Math. Mag.*, 16(2008), no. 1A, 270-274.

- [154] On almost $I - \varphi$ perfect numbers (with F. Luca), *Octagon Math. Mag.*, 16(2008), no. 1A, 283-285.
- [155] On the equation $\sigma_k(n)/d(n) = n^k/2$, *Octagon Math. Mag.*, 16(2008), no. 1A, 288-290.
- [156] On certain cases of insolvability of the Diophantine equation $ax^2 - by^2 = 1$, *Octagon Math. Mag.*, 16(2008), no. 1A, 291-293.
- [157] On the inequality $\sigma(n) < \frac{\pi^2}{6} \psi(n)$, *Octagon Math. Mag.*, 16(2008), no. 1A, 295-296.
- [158] On Popoviciu type inequalities for the ψ and σ functions, *Octagon Math. Mag.*, 16(2008), no. 1A, 320-322.
- [159] On inequality $\alpha(n) > n + n^{1/2} + \dots + n^{1/k}$, *Octagon Math. Mag.*, 16(2008), no. 1B, 792-793.
- [160] On the number of divisors of $2^n + 1$ and $2^n - 1$, *Octagon Math. Mag.*, 16(2008), no. 1B, 795-796.
- [161] An inequality involving a Dirichlet series and a ratio of zeta functions, *Octagon Math. Mag.*, 16(2008), no. 1B, 817-819.
- [162] Extremal orders of compositions of certain arithmetic functions (with L. Tóth), *Integr.: Electronic J. Comb. Numb. Th.*, 8(2008), #A34, pp. 1-14.
- [163] On a modification of perfect numbers (with K. Atanassov), *Adv. Stud. Contemp. Math.* 17(2008), no. 2, 249-255.
- [164] On multiplicatively σ -perfect numbers (with L. Tóth), *Octagon Math. Mag.*, 16(2008), no. 2, 906-908.
- [165] On $S(n! + 1)$, where S is the Smarandache function (with F. Luca), *Octagon Math. Mag.*, 16(2008), no. 2, 1024-1026.
- [166] On inequality $\prod_{k=1}^n \sigma(\varphi(k)) < n!$, *Octagon Math. Mag.*, 16(2008), no. 2, 1031-1033.
- [167] A note on the equation $S(d(n)) = d(S(n))$ (with F. Luca), *Octagon Math. Mag.*, 16(2008), no. 2, 1038-1039.
- [168] On the difference $\varphi(n) - \varphi(\alpha(n))$, *Octagon Math. Mag.*, 16(2008), no. 2, 1281-1282
- [169] An elementary upper bound for $\sum_{k=1}^n \sigma(\varphi(k))$, *Octagon Math. Mag.*, 16(2008), no. 2, 1289-1292.
- [170] On the equation $\alpha(kn) = (k + 1)n - k$ (with Ilka Sándor), *Octagon Math. mag.*, 16(2008), no. 2, 1304-1306.
- [171] On the equation $2\alpha(kn) = (\alpha(n))^k + (\alpha(k))^n$, *Octagon Math. Mag.*, 16(2008), no. 2, 1312-1313.
- [172] On the equation $\frac{\sigma(x)}{d(x)} = \frac{\sigma(y)}{d(y)}$ (with L. Kovács), *Octagon Math. Mag.* 16(2008), no. 2, 1313-1315.
- [173] On the sequence of composite odd integers, *Octagon Math. Mag.*, 16(2008), no. 2, 1323-1325.
- [174] On the Euler minimum and maximum functions, *Notes Number Theor. Discr. Math.*, 15(2009), no. 3, 1-8.
- [175] On the monotonicity of the sequence (σ_k / σ_k^*) , *Notes Number Theor. Discr. Math.* 15(2009), no. 3, 9-13.

- [176] On the composition of a certain arithmetic function (with F. Luca), *Functiones et Approximatio Comm. Math.* 41(2009), no. 2, 185-209.
- [177] The product of divisors minimum and maximum functions, *Scientia Magna*, 5(2009), no. 3, 13-18.
- [178] A note on f -minimum functions, *Scientia Magna*, 5(2009), no. 3, 72-75.
- [179] Euler and music. A forgotten arithmetic function by Euler, *Octogon Math. Mag.*, 17(2009), no. 1, 265-271.
- [180] A divisibility property of $\sigma_k(n)$, *Octogon Math. Mag.*, 17(2009), no. 1, 275-276.
- [181] A double inequality for $\sigma_k(n)$, *Octogon Math. Mag.*, 17(2009), no. 1, 285-287.
- [182] On certain inequalities for the sigma function, *Octogon Math. Mag.*, 17(2009), no. 1, 294-296.
- [183] On f -amicable pairs, *Octogon Math. Mag.*, 17(2009), no. 2, 627-636.
- [184] On certain conjectures in prime number theory, *Octogon Math. Mag.*, 17(2009), no. 2, 727-732.
- [185] An inequality for the number of divisors of n (with L. Kovacs), *Octogon Math. Mag.*, 17(2009), no. 2, 746-750.
- [186] A better lower bound for $\alpha(n)$, *Octogon Math. Mag.*, 17(2009), no. 2, 767-768.
- [187] Inequalities involving $\sigma_2(n)$, *Octogon Math. Mag.*, 17(2009), no. 2, 736-740.
- [188] An improvement of the Bagchi–Gupta arithmetic inequality, *Octogon Math. Mag.*, 17(2009), no. 2, 771-773.
- [189] An application of the Catalan equation, *Octogon Math. Mag.*, 17(2009), 965-966.
