

Preface

With the present Supplementary issue of the International Journal *Notes on Number Theory and Discrete Mathematics*, Vol. 20, No. 5, we are happy to commemorate the Journal's 20th anniversary.

During these years we faced a series of organizational and financial difficulties, and we are constantly learning from our mistakes. However, with the increasing visibility and popularity of the Journal, we already look in the future with optimism.

For instance, during the last two years we received more than 200 paper submissions, from which about 80 papers have been positively reviewed, accepted and published.

To all members of the Editorial Board, all reviewers, all NNTDM authors and the whole Number Theory and Discrete Mathematics research community, we wish

Happy New
